Difficulty level

Purpose

Line and Weight Control

Objective

Two teams play against one another on the same sheet. Each team donates four of its stones to be part of a line of stones in front of the house. These stones are placed alternately by colour with about a stone's width between each, approximately one metre in front of the house.

Each player then delivers one stone in game fashion alternating with the other team. The object is to score points by "raising" stones into the rings.

Scoring

When the last stone has come to rest, the score is determined.

Each team can score points.

The rings have value,

12 ft. (Blue ring) = 2 points,

8 ft. (White ring) = 3 points,

4 ft. (Red ring) = 4 points

Button (White circle) = 5 points.

If you can remove an opponents' stone(s), go right ahead.
