

## Lino step in slides

Can be used for beginner level.

A cheap robust alternative to overshoe bags

Created at Lanarkshire Ice Rinks.

Using a step on Teflon slider as a template. Cut out the shape from some linoleum.

These can be used as a slow slide for beginner.

More robust than the "blue bag" slides.

One size fits all.

Easier to put on and take off during ice time.

Can be made in a variety of colours !
